CareerFoundry Project - MyFlix React App

- Created a REST API with Node.js and Express.js and then used Mongoose to interact with a non-relational database (MongoDB) of movies stored as JSON objects.
- Tested the API with Postman, wrote clean and concise documentation for the endpoints, and deployed the API with Heroku.
- Built the application's client-side using React as a single-page, responsive application with routing, rich user interactions, several interface views, and a polished user experience.
